3D Printing

## Projects / Work Experience

### OOCA – UX Designer

2021 | Bangkok, Thailand

- created a design system integrated with Figma (for both mobile and web) and workflow guide for other and product designers
- led and mentored 3 other designers to adhere to the design system
- created a design workflow document for other designers to follow
- conducted regular user research trials with 10+ people to map out entire mobile application plan
- completed the interface design for 5+ features

### Agoda, Bookings.com Subsidiary – UX Designer

Summer 2019 | Bangkok, Thailand

- worked in a fast paced startup environment of 50 to deploy the new Agoda Flights platform
- led the Family Trip project, a self-defined design project, going through research, strategy, execution, and presentation to leaders of the company
- collaborated closely with developers and other designers to fix everyday tickets

### Community Forge Playground – Designer

Spring 2019 | Pittsburgh, PA

- conducted user research through interviews, site visits, and engagement sessions with the community
- research, design, and build parts of the Community Forge playground in a team of 10, involving hands-on community meetings
- secure \$10,000+ grants for the further development of the Community Forge Playground
- led the design-build team for the furniture pieces designed for the playground

### TROP terrains + open space – Architectural Design Intern

Summer 2017 | Bangkok, Thailand

- assisted in the architectural and landscape design of various large commercial projects in Thailand and China
- created drawings, diagrams, and presentations for client meetings

### STARRYWORKS Co., Ltd. – Design Intern

Summer 2018 | Osaka, Japan

- assisted in designing lighting for an installation to promote Toyota's OLED screen
- independently designed and digitally fabricated a paper wearable dress that reacts to music for the STARRYWORKS storefront installation
